

MetricFlow SOC 2 Review

Analyst review of simulated Type II assurance evidence

SIMULATED DOCUMENT FOR PUBLIC PORTFOLIO USE

Report type	SOC 2 Type II
Audit period	April 1, 2025 to March 31, 2026
Opinion	Unqualified
Criteria	Security and Availability
Service scope	Production SaaS environment included
Subservice method	Cloud hosting carved out

Review results

Area	Observation	Follow-up	Status
Audit period	Coverage ends March 31, 2026.	Obtain a bridge letter through onboarding.	Follow-up
Scope	Security and Availability are in scope. Confidentiality is not.	Validate confidentiality through other evidence.	Follow-up
Exception	One quarterly access review was delayed.	Confirm completion and corrective action.	Follow-up
CUECs	SSO/MFA configuration, user provisioning, and API-token storage depend on the customer.	Assign internal owners before approval.	Open
Subservice organizations	Cloud hosting is carved out.	Review relevant provider assurance separately.	Follow-up
Significant changes	No material changes are stated.	Reconfirm through the bridge letter.	Follow-up

Conclusion

The Type II report supports reliance on the tested Security and Availability controls for the audit period. It is not sufficient by itself. Confidentiality is outside scope, cloud hosting is carved out, relevant CUECs still need internal owners, and the period must be bridged through onboarding.

Evidence requested

- Bridge letter covering the period after March 31, 2026.
- Evidence that the delayed access review was completed and the cause addressed.
- Internal ownership mapping for relevant CUECs.
- Current cloud-provider assurance where it affects the service.
- Confirmation of no material changes after the report period.
